MFC®

INNOVATIVE MFC & MELAMINE MDF/
PLYWOOD/WPB PANELS

Every material decision shapes how a space is experienced — and the surface is where that experience begins. An Cuong's Innovative Melamine-Faced Panel Collection is built around that principle: a wide range of sizes, finishes, textures, and core options — including Particle Board (PB), Medium Density Fiberboard (MDF), Plywood, and Waterproof Board (WPB) — giving architects and designers the freedom to specify with precision.

Behind the collection is a continued investment in surface technology. Our Synchronized range pairs décor and texture at the grain level using advanced EIR techniques from Germany, while Luxeffect takes tactile realism further still with three-dimensional raised-grain surfaces that blur the line between engineered panel and natural material. With this breadth of substrates and surfaces, the range meets the technical and aesthetic demands of modern interior specification — from residential projects through to commercial fit-outs.
