INTRODUCTION...

HIWIN is leading brand in the kitchen and bathroom industry in China, which is specialized in manufacturing kitchen and bathroom hardware. Currently there are more than 2000 people in the company, and the total area of the industrial zone is over 200000 square meters. The main products are kitchen and bathroom hardware, including faucet, sinks, hangers, and bathroom accessories. Our vision is to become the best partner in people's life, making people enjoy high-quality and comfortable living environment and at the same time continuously improving the quality of life for HIWIN colleagues in the aspect of both material and culture.

In order to expand our service area, HIWIN company has invested huge amount of money to design and manufacture high-end customized whole-set bathroom and successfully explored to the market, we have successfully proved that we are not only the king of standard products, but also the king of customized-bathroom. our customized bathrooms have perfectly satisfied our high-end customers in the market, and made our customers fully enjoy the time of taking shower at home.

Concentration, dedication, honesty and innovation are our core value, being open-minded, absorbing different thinking and ideas from all types of people, fighting as one team for our future and customer-oriented are our central culture, being stable, keeping low-profile and being high efficiency in the work is HIWIN working style. We will persist in creating happy and comfortable life for both our customers and our colleagues as our mission.

We believe that with our energetic , team-working, open-minded and customer-oriented culture, we will achieve our goal finally, which is giving our customers the best products and service, meanwhile making our colleagues' dreams come true.

PRODUCT FEATURES

1.High quality stainless steel: SUS 304 material is carefully selected. It is guaranteed to reach ASTM certification by China material standard testing agency. It is good raw material that decides product's quality.

2.Producing process: The producing process is strictly controlled to ensure product features as well as its appearance. Before coming out from factory, each product must be gone through with rigorous testing process. Products under standard will not be able to come to market.

3.Revenue: Every year, about 80,000 sets of hardware accessories are sold out. In China, many high end projects have chosen our products.

4.Products characteristics: Hinge has a good elasticity, that means will find it easy to open and close door gently and smoothly. When the closing angle reaches 25 degrees, the door will automatically slowly close.

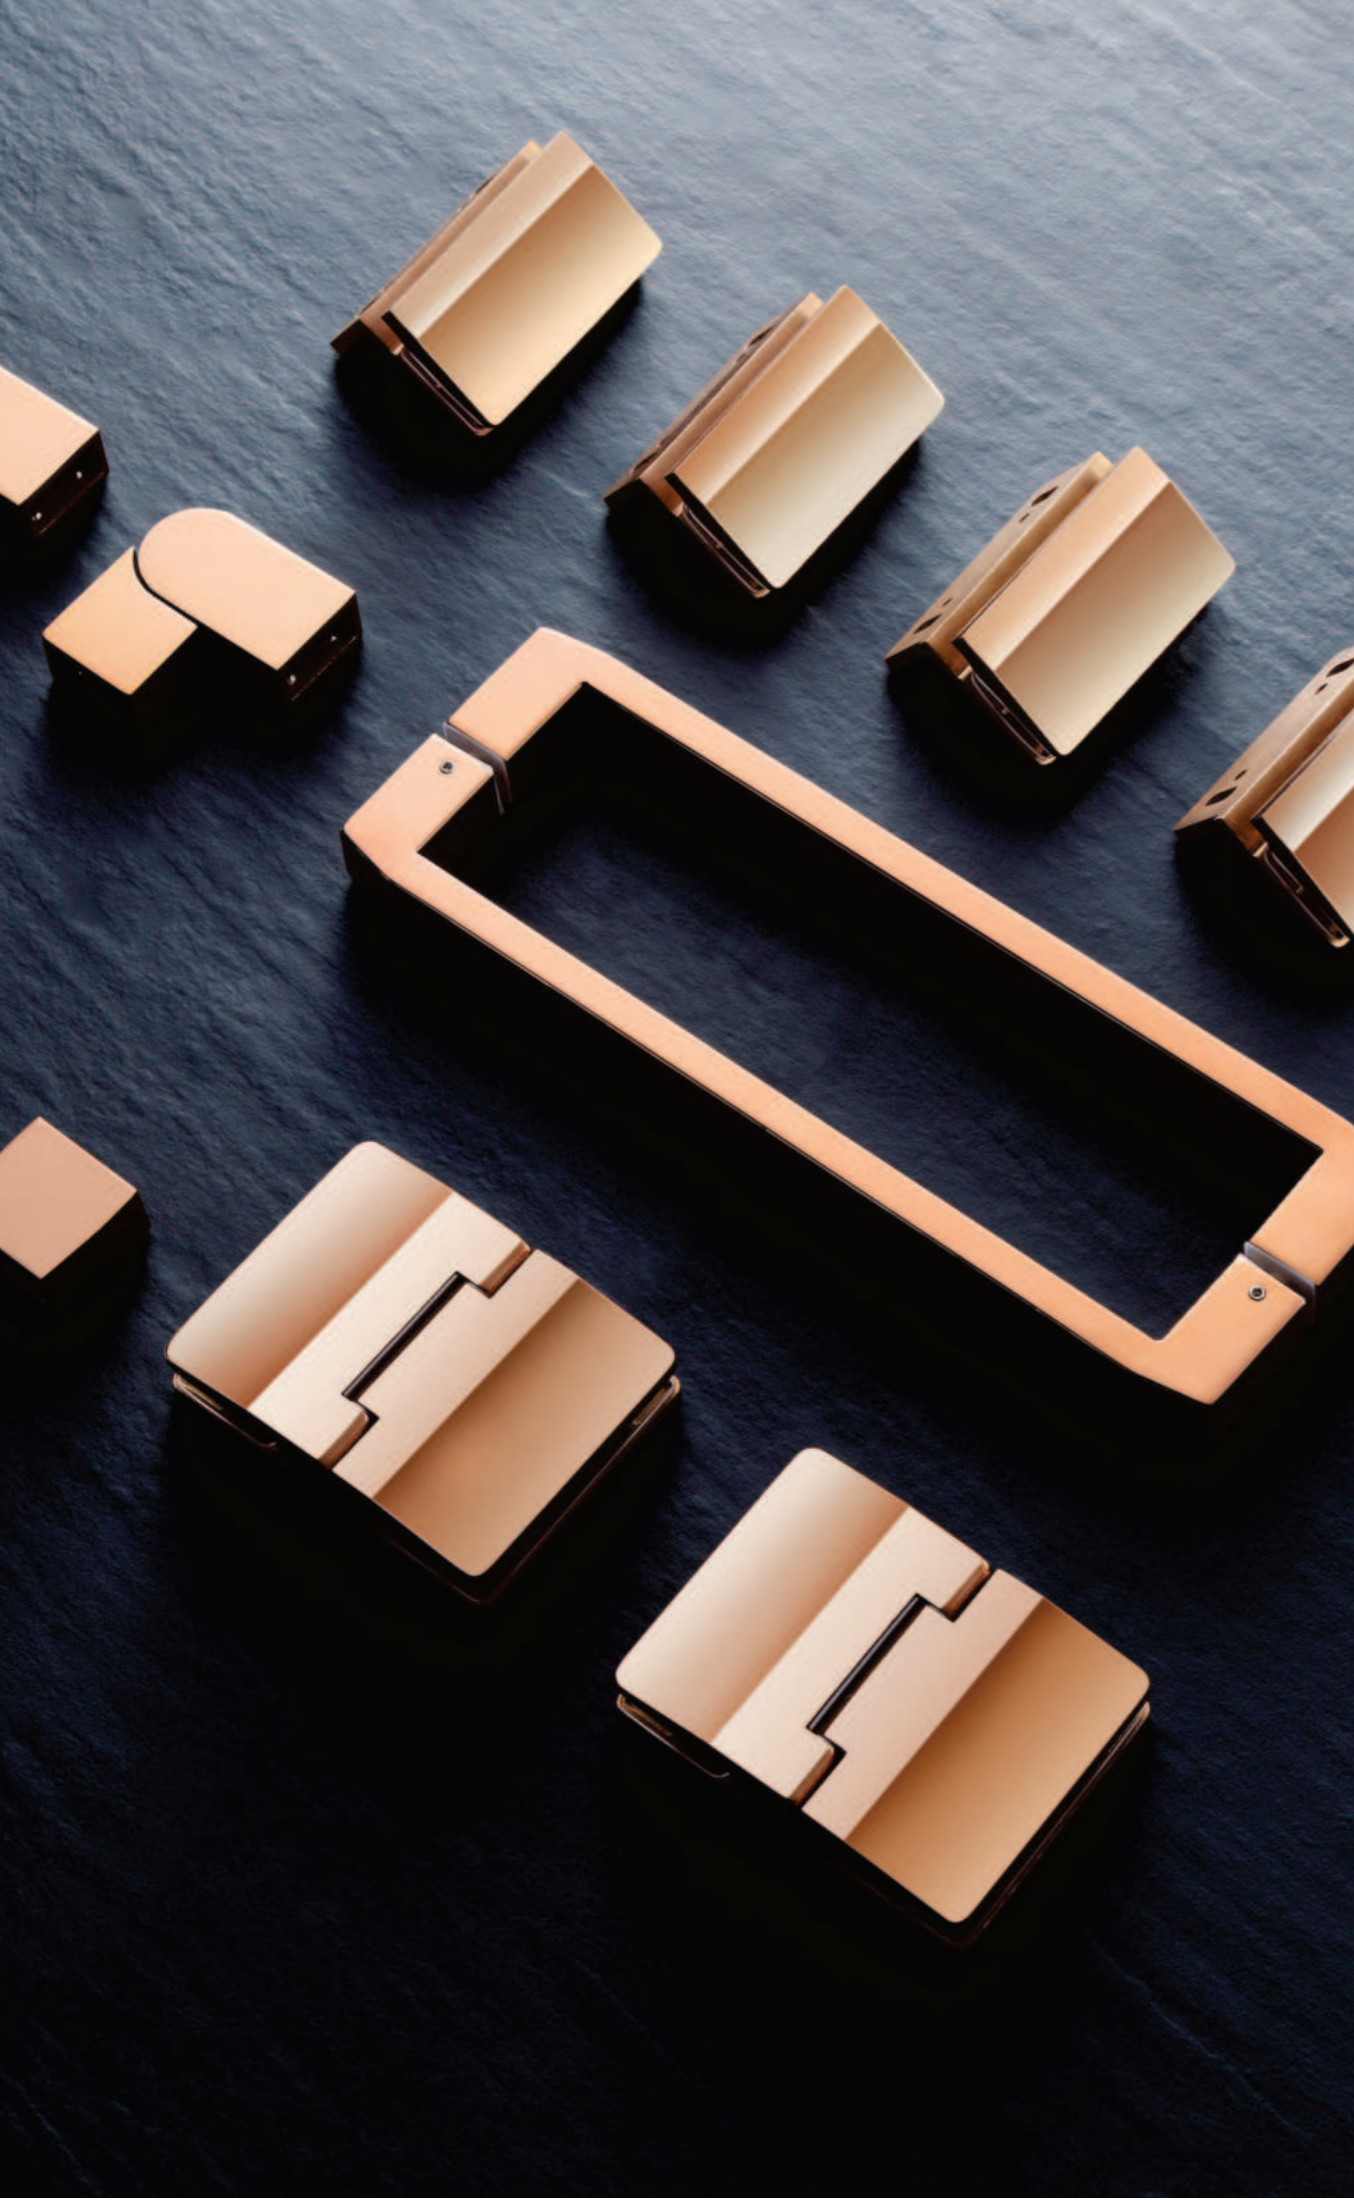

5.Products standards: All products are in accordance with the standards of Chinese construction, and are warranted for 2 years.

The Graceful

Every line is filled with aesthetic Feeling
Every piece of product is a piece of art Work
Every piece of product has a moving story behind

HEBES

HEBES D

Glass thickness: 8mm/10mm
Material: Stainless steel 304
Color: Mirror
Dimension: L: 1200-1900
H: 2000

HEBES series is currently only double sliding door products suitable for 10mm toughened glass, the newly developed heavy stainless steel casting pulleys use imported PU material and the new upper track move quiet and smooth; HEBES series uses newly developed clamping slot type of lower pulley position-limit mechanism, which eliminates the slight wobbling of the lower end when the toughened glass moves and reduces the trouble of installing the position-limit sliding block on the lower track, so that the overall shape of the products is more simple and beautiful; HEBES series with unique position-clamping type of dual-slot anti-collision block reduces installation problems, and can effectively improve the life of anti-collision block. It will not loosen after 100,000 times anti-collision test.

PHOEBE

▲ PHOEBE D

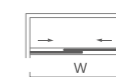

Glass thickness: 8mm/10mm
Material: Stainless steel 304
Color: Wooden rose gold/ Oak wood
Dimension: L: 1200-1900
H: 2000

PHOEBE series is only European-style double sliding door product. The upper track with the new processing technology perfectly embodies the complex European-style curved lines; the upper track uses all kinds of grain with rich northern Europe style, which perfectly matches the luxurious European decoration style, with first-class visual effects; the upper and lower tracks, vertical materials, pulley structure and handles of the entire product use the plates of uniform color and grain and integrate as a whole by a large number of high-precision mold, so PHOEBE European styles sliding doors become unique luxury products on the market at present.

VENUS

The steel wire linkage independently developed by makes VENUS three linkage stainless steel sliding door display the most perfect linkage effect. Both the linkage effects when moving and the overlapping part between the glass can achieve the finest dimension control; elegant shape of stainless steel double pulley hanging wheel, unique eccentric regulation technology, and easily-installed embedded steel wire linkage make VENUS series stainless steel linkage door achieve the industry's highest standards of technology and also completely solved the long-term difficulty in tedious installation debugging.

ATHENA

ATHENA E

Glass thickness: 8mm/10mm
Material: Stainless steel 304
Color: Black Titanium/ Mirror
Dimension: L: 900-1900
H: 2000

Low-key and restrained style is original intention at the beginning. ATHENA pulley hidden type of double sliding door precisely reflects original intention. The widened upper track completely hides the special pulley with superior performance and makes the appearance of the product clean and tidy. A complete set of products is the combination of lines and contour to achieve totally natural industrial atmosphere; wide stainless steel mirror effect of the upper track under the light makes the shower space shine.

ATHENA D

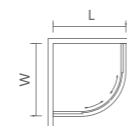

Glass thickness: 8mm/10mm
Material: Stainless steel 304
Color: Black Titanium/ Mirror
Dimension: L: 1200-1900
H: 2000

NOTUS

NOTUS has the integrated upper and lower stainless steel tracks with a structural patent (patent number: ZL 2012 2 0346293.5); it abandons the traditional embedded aluminum chute design, which truly realizes the concept of full stainless steel material; the original V-shaped groove structure makes pulley sliding more smooth and quiet; the special flanging structure not only completely solves the water leakage phenomenon that cannot be solved in the conventional structure design but also makes installation easier; also designed the free positioning structure with structural patent, which completely solves the welding, drilling
